System Requirements xii
Use of This Manual xii
Organization of This Manual xii
Manual Contents xii
Form of Presentation xiii
Installation Note xiv

Chapter 1 Getting Started

Chapter Overview 1.1
Beginning a Telnet Session 1.1
Opening a Connection 1.1
Logging in to Your Host 1.2
Setting a Terminal Type 1.3
Closing a Connection 1.3
Cutting, Copying, Pasting, and Printing 1.4
Exiting NCSA Telnet 1.5

Chapter 2 Using the Keyboard

Chapter Overview 2.1

Using Keyboard Commands 2.1

Emulating Menu Commands 2.1

Setting the Functions of BACKSPACE (or DELETE), OPTION, and Backquote 2.2

Emulating a VT102 Terminal 2.5

Changing the Assigned Keys for Interrupt, Suspend, and Resume 2.6

Defining Macros 2.8

Reverting to the Previous Macro

Definition 2.9

Entering Macro Key Sequences 2.9

Chapter 3 Customizing the Environment

Chapter Overview 3.1

Using the Configuration Dialog Box 3.1

Window Name 3.2

Columns 3.2

Backspace Is 3.2

Tek Clear Screen 3.3

Return Sends 3.3

Echo Mode 3.3

Scrollback 3.4

Using the Preferences Dialog Box 3.4

Copy Table Threshold 3.5

Command Keys 3.5

Remap Option Key to Control 3.5

Remap Backquote to ESCape 3.6

MacBinary 3.6

Reset MacBinary for Each FTP 3.6

Windows Don't Go Away on Close 3.6

Using the Session Menu 3.6

Backspace 3.7

Delete 3.7

Local Echo 3.7

Wrap Mode 3.7

Clear Screen Saves Lines 3.8

Reset Terminal 3.8

Jump Scroll 3.8

TEK Page 3.8

Set Usable Lines 3.8

Setup Keys 3.10

Font 3.10

Size 3.11

Color 3.11

Chapter 4 Advanced Features

Chapter Overview 4.1

Saving Session Characteristics 4.1

Saving a Set 4.1

Using a Saved Set 4.2

Opening Multiple Connections 4.3

The Connections Menu 4.4

Aborting Connection Attempts 4.5

Telnet Options 4.5

Send "Are You There?" 4.6

Send "Abort Output" 4.6

Send "Interrupt Process" 4.6

Send “Erase Character” and “Erase Line” 4.7

Network-Related Commands 4.7

Suspend Network 4.7

Show Network Numbers 4.7

Configure Network 4.7

Reset Terminal 4.8

Chapter 5 File Transfer

Chapter Overview 5.1

Terminology 5.1

ASCII File 5.1

Binary File 5.1

Client/Server 5.1

File Transfer 5.1

MacBinary File 5.1

About FTP 5.2

Transferring Files 5.2

Invoking FTP on the Host Computer 5.2

Issuing the FTP Command 5.3

FTP Commands 5.4

FTP Log 5.4

Setting the Transfer Mode 5.4

Changing the Default Directory 5.5

Transferring Files to the Macintosh 5.5

Transferring Files to the Host 5.6

Transferring Multiple Files 5.6

Transferring MacBinary Files 5.7

Resetting MacBinary for Each FTP 5.7

Chapter 6 Tektronix 4014 Emulation

Chapter Overview 6.1

Tektronix Graphics Emulation 6.1

Getting Started 6.1

Using TEK Page 6.1

Graphics Window Operations 6.1

Detaching a Graphics Window 6.1

Deleting a Graphics Window 6.2

Zooming/Unzooming a Graphics Window 6.2

Copying a Graphics Window 6.3

Printing a Graphics Window 6.3

Chapter 7 Interactive Color Raster Graphics

Chapter Overview 7.1

Interactive Color Raster Graphics 7.1

Starting ICR Graphics Emulation 7.1

Using the ICR Protocol 7.2

Description of the Protocol 7.2

ASCII Encoding 7.4

Run-Length Encoding Format 7.5

Color Maps 7.6

ICR Graphics Windows 7.6

Allocating Memory 7.6

Copying a Graphics Window 7.6

System Color Problems 7.6

Example ICR Program in C 7.7

Chapter 8 System Administrator Information

Chapter Overview 8.1

NCSA Version and MacTCP Version 8.1

Configuring Network Parameters 8.1

Assigning an Internet Number (NCSA Version) 8.2

Static IP Numbers (EtherTalk, Croft, or Kinetics) 8.3

Dynamic IP Addressing 8.3

Internet Subnetting 8.3

NCSA Telnet Settings File 8.4

Configuration File 8.5

Placing the Configuration File 8.5

Entry Syntax 8.5

Entering Macintosh Information 8.6

Entering Host-Specific Parameters 8.8

Converting UNIX/etc/hosts Files 8.12

Hardware Options (NCSA Version) 8.13

Combined Network Drivers 8.13

AppleTalk and EtherTalk 8.13

Performance Tuning 8.14

Domain Name Lookup 8.14

Domain Search Order 8.14

Default Domain 8.15

FTP Password Protection 8.15

Compatibility 8.15

Ping 8.15

VT102 8.15

ICMP Redirects 8.16

Trailers 8.16

FTP 8.16

Telnet 8.16

Limitations 8.16

Appendix **A** Error Conditions

Appendix **B** Code to Convert /etc/hosts Files
