The bidi *Package*

Source documentation for version 25.2.2

to my Master, ***Ferdowsi The Great***

If you want to report any bugs or typos and corrections in the documentation, or ask for any new features, or suggest any improvements, or ask any questions about the package, then please use the issue tracker:

`https://github.com/xepersian/bidi/issues`

In doing so, please always explain your issue well enough, and always include a minimal working example showing the issue.

You may also have conversations, ask questions and post answers without opening issues using the Discussions space:

`https://github.com/xepersian/bidi/discussions`

The announcements for the new releases of the package will also appear in the Discussions space under the Announcements category.

% General loop macro:
% \looprepeat
%   \forvariable{<var>} \fromvalue{<start>} \bystep{<step>} \tovalue{<end>} \downtovalue{<en
%               \untilcondition{<cond>} \whilecondition{<cond>}
%   \doloopbody { <loop body> }
% where all control sequences in between \looprepeat and \doloopbody are optional.
%
% var: characters to form a control sequence;
%    after \forvariable{index} you can access the loop counter as \index.
%    This is a count register; to print it use \number\index.
```

```
% start,step,end: integers with obvious relations to the loop counter;
%    start and step have a default value of 1
% cond: (sequence of commands ending in) any TeX \if... test.
%
% Count down instead of up with \downtovalue; the increment given in \bystep
% is always positive, and is added or subtracted accordingly.
%
% Tests: \untilcondition is evaluated at the end of the loop body; \whilecondition
% at the beginning of the loop body.
%
% Exit from middle of loop: \breaklooprepeat
% use this at any place in the loop; in case of a conditional use
%   \ifsomething ... \expandafter \breaklooprepeat \fi
%
% Note that the line ends do not cause spaces in the output.
%
% Technical details:
% The loop body is not executed in a group: the braces are those
% of a token list.
% The `forvariable' variable is \let to a \count register.

% Auxiliary stuff
