SCRIPT NAME

transfer_option.pql

DESCRIPTION

Demonstrates use of 'transfer' option and &date() macro. Note the &date() macro converts date values to YYYYMMDD format.

1. PROCESS DETAILS

Input records are read from standard input. The input record contains **8** fields. Fields are delimited by the '|' character.

Output records are written to standard output. The output record contains **15** fields. Fields are delimited by the '|' character.
